

# Give your students an edge — without building the tech yourself

RajyaRank is a bilingual (Hindi & English) exam-prep platform your institute runs under its own console — courses, tests, current affairs and doubt-resolution for students, plus content review, at-risk alerts and automated payouts for your team. Live and running today, pan-India, not a prototype.

1

## Exam Readiness Score

One transparent number per student — concept mastery, syllabus coverage, revision retention, test efficiency, consistency — computed live, never a black box.

2

## Mistake DNA

Classifies *why* an answer was wrong — concept gap, slow calculation, guessing, misread — so revision time goes to the real problem, not a generic "wrong answer."

3

## Intervention Radar

Flags at-risk students automatically — inactivity, falling behind plan, score decline — refreshed hourly, with the exact evidence behind every flag.

## WHAT YOUR INSTITUTION GETS

### For your students

- **Live & recorded classes**, video/PDF lessons mapped to your syllabus
- **Timed mock tests** with instant, question-by-question review
- **Daily current affairs** and previous-year question papers
- **Doubt resolution** — threaded replies from your real teachers
- Available in **Hindi and English**, on web and mobile

### For your team

- Your own **branded console** — scoped strictly to your institution
- **Maker/checker** content workflow — nobody publishes their own work unreviewed
- **Sell your own courses** with automated, transparent revenue settlement
- Staff roles, permissions and a full **audit trail** on every sensitive action
- Support-ticket queue and student-lookup tools built in

argon2id password hashing

Step-up MFA on sensitive actions

Full tenant isolation

Razorpay-verified payments

Signed, expiring content URLs

## See it running on your own content

15-minute guided walkthrough — your syllabus, your cohort, no obligation. Transparent per-institution pricing, quoted during your demo.
